Project Done : 2

Technical Skills : Machine Learning, Internet of Things

1. pH Evaluator for Problem Soils

2. Digit Recogniser

Technology : Machine Learning

Category : Micro

Mentor Review : Good

Duration : 6 Weeks

Project Link :

Project Status : In Process

Abstract

Learn and apply key machine learning methodologies and algorithms on the famous MNIST dataset on pixel-values of images of hand-written numerals (0 through 9), with the end-goal of improving 'Computer Vision' through analytical models that can accurately predict the digit when fed the underlying pixel values.
